Varyap Meridian H Block

The H Block building is situated in the Varyap Meridian Complex, which consists of five high-rise residential blocks, three business blocks and 14 villas. H Block is designed as an office building. The high-rise residential blocks range in color from orange to blue. The H Block building has 10 floors; two underground levels serve as a parking lot and a hypermarket. The main design idea of the façade is derived from the capital letter of Varyap. The letter "V" is used to form the building's patterned skin. The section of aluminum profiles was specially designed for this LEED certified building.
